

Professional Development

To supplement our proven TCA Test Preparation System, we offer a complete line of professional learning environments. We provide a variety of Professional Development implementations that can be supported within any school environment. Our Professional Development offerings are flexible to allow you greater opportunities to provide advancement for your teachers and staff. Let our educational consultants help you select the most effective combination to build success and confidence throughout the school year.

Quick Start Professional Development

To get you up and running quickly, TCA provides a 1-day professional development workshop on-site. Taught by a master educator, this workshop prepares teachers, counselors, curriculum specialists, and administrators for immediate implementation of our successful TestPrep program.

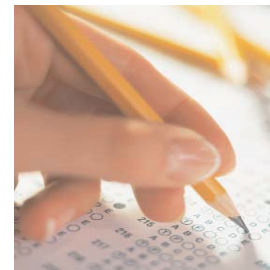

Job-Embedded Professional Development

With TCA's Job-Embedded Professional Development, we have developed a cost-effective solution to establishing objectives, benchmarks, and evaluative assessments that help your teachers take their students to a higher level of readiness and achievement in high-stakes testing. Our consultants come to your school during the school day and work with your teachers in a classroom or lab situation to refine their understanding of our Data Reporting and Management System. In addition, we work with you to design a TestPrep Action Plan and show you how to evaluate and apply student data to generate lessons that address the needs of large groups or individual students. We help you achieve proven results that are data driven.

"TCA test preparation tools have given us the flexibility to provide a variety of strategies to reach our students. The day I spent in your training was one of the best investments of my staff's and my time."

*Wayne Thibeault, Principal
Sparrows Point High School, Baltimore, MD*

PROVEN RESULTS DATA DRIVEN

5 STEPS TO TEST PREP SUCCESS

Understand the Test

We take time to understand the test structure which helps students become familiar with the test format. This alleviates test anxiety.

Take a Real Test

Take a test under realistic conditions. This ensures students receive a precise diagnosis that results in an accurate understanding of their weakest skills.

Score and Analyze

Students receive a Skills Feedback Report tailored to their needs. We spend time scoring and analyzing the results. Students see the specific skills they need to focus on.

Review Skill Deficiencies

Once students discover their weakest skills, they review those specific skills through lessons and quizzes. Each lesson targets exactly what is needed to be successful.

Develop Test-Taking Strategies

This is a great wrap-up. Students go back and rework the questions they got wrong on the diagnostic test and develop successful test taking strategies. This critical step helps build student confidence and ensures test taking success.
